

## Hydroglass allows you to shower while lying down on a fish tank

Sunday, 17 January 2010

Showering standing up? That's for savages. I want to lie down when I bathe—and I want it to be on a bed of colorful fish. I want a Hydroglass. In addition to the fish tank base, Hydroco's Hydroglass unit can feature a 7-head rainbar, heated aquabed, warm water mattress and other accessories when fully decked out. It's going to start a revolution of laziness in the bathroom.

That's right—sooner or later we will be able to poop lying down. What a day that will be.
